## CANYON CREST

restaurant | twin falls, idaho

Holding true to its namesake, the Canyon Crest Restaurant is impressively situated at the edge of the Snake River Canyon overlooking the Perrine Falls in Twin Falls, Idaho. Patrons can absorb the endless vistas from the nearly 5,000 square feet of terraced patios. Since the terraced patios are perched a few dozen feet from the canyon rim, it was important, to both BRS and the owner, to employ a natural, locally quarried stone to match the canyon wall. Almost as remarkable as the location, the interior of the building consists of a spacious dining hall with exposed timber trusses accented with a subtle hint of modernity. As one makes their way through the formal antechamber they are dramatically introduced to a world class wine selection nestled between earthy stone columns in a custom-made wine rack.

This versatile enterprise consists of a world class restaurant, a private wine tasting room, a piano bar, a grand ballroom as well as a generous kitchen to support these amenities. One final element of this project to highlight, is the eight person rotating table that was installed to appreciate one of the finest observation points in Idaho, so popular that a group of local businessmen have a standing reservation for this extraordinary table every Wednesday evening at 5:00.
