BANK OF THE WEST

financial | multiple locations

BRS Architects has had the pleasure of working with Bank of the West on several of their locations throughout the Treasure Valley. Through a close working relationship we were able to give a lot of care and attention to the entire process. One of the vital parts of the process was the time spent in space planning and understanding how each function of the bank related to each other. With this level of understanding we were able to provide spaces that had the flow and adjacencies they look for in a successful project.

Currently BRS Architects has designed 4 locations for Bank of the West in the Treasure Valley. Two locations in Boise and one location in Meridian and Eagle.
