LINEBERRY ORTHODONTICS

healthcare | boise, idaho

Working with Dr. Laura Lineberry, BRS Architects formalized a plan that was based on her design to create a fun nautical theme for her patients of all ages. The large reception area is centered by a massive six foot wide aquarium. From the reception area, patients go to the on-deck area, which is an open room with brushing stations and seating. The office features a total of six treatment chairs, one of which is fully enclosed for the adult patients. The five non-enclosed chairs face a large window wall that looks into an outdoor garden area. The office space also features a business office, consulting office, sterile lab, storage room and break area. The nautical theme was prominent throughout the design.
