TREASURE VALLEY HOSPITAL

healthcare | boise, idaho

BRS has worked with Treasure Valley Hospital on several projects over the years beginning with the planning and zoning entitlements for the original hospital construction in 1997. Since then, BRS has designed a new sleep lab as well as a physical therapy suite in 2003. Most recently, BRS designed a new MRI addition and CT scan remodel constructed in May of 2006. As part of our ongoing relationship, we continue to assist the hospital as they plan for the ever-changing demands of the healthcare industry.
